ABOUT US

Torima Technology limited was founded in the year 2017 in Delta State, Nigeria. It is a cutting edge Communication, Automation, Security and Safety systems solutions providers. We are developing into a world-class stage brand with unique capacities in providing real solutions management and technical consultancy in the emerging markets of Information, Communication security and safety systems. With our crew of experienced professionals, we give practical businesses experience with innovation and priorities in areas of ICT advancement. Torima Technology is a fast-growing ICT company. From inception, we have sustained a clear and unwavering direction in producing high grade Hardware/software products and services for use in Information Communication Technology areas, On-time delivery, Customer service, and standard control. This gives us the competitive advantage in the IT/Computer Services.

TORIMA TECHNOLOGY LTD was selected among 2019 Tony Elumelu Foundation Entrepreneurs Programme in partnership with Africa Development Bank as one of the emerging companies with the most innovative business ideas under ICT with the sole goal of improving security to Assets and Properties, reducing accidents on the roads and creating jobs to its community. Our company knows that victory can only be attained by making customers happy through quality customer service; we are in partnership with various ICT companies within and outside Nigeria to enable us push our service delivery across the globe. Torima Technology is devoted to distributing standard products at affordable pricing while providing our customers with reliable and personal service that a small business provides.

VISION STATEMENT

To become a realistic facilitator to our customer's business model. We will proceed to close all gaps in skills and experience with customer business needs.

MISSION STATEMENT

To constantly provide our clients with standard technology solutions to help them stay secure and relevant in today's world.

OUR VALUES

Some of our set's values are:

Sound and Professional ethical approach to business.

Utilize the consultant plan in rendering services to our customers.

Compliance to international standard practices and procedures in Services deliver and support, projects management with quality assurance.

Consistent investment in our teams to keep developing their skills and abilities to customers.

OBJECTIVES

- Change the narrative about security systems distributions especially GPS device installations.
- To make GPS Device and our other solutions Accessible to both the rural and urban area in Nigeria.
- Presently, we are distributing our device to a larger part within and outside our state for installations. Our goal is to have distributors outlets in 36 states of Nigeria within the next 5 years.
- We also want to spread our service delivery in terms of installations of our products to every part of Nigeria.

VALUE PROPOSITION

We bring new innovation to Automation, Safety, Communication, security and GPS technology design and function with warranty and nationwide service delivery to all security conscious individuals.

- Airlines and Airport RFID Systems
- Access Control RFID Systems
- Asset Tracking RFID Systems
- Car Dealership RFID Systems
- Event Management RFID Systems
- Ticketing Parking Control RFID Systems

- Property Management RFID Systems
- VIP Parking RFID Systems
- Active RFID vehicle Tracking
- RFID Inventory Tracking
- RFID project Materials Tracking

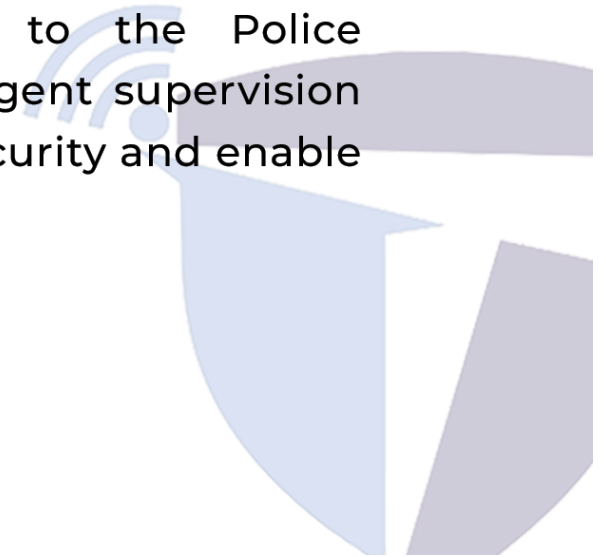

AREAS OF INTEREST

Residential Areas:

Public security is of vital concern around residential areas such as apartment complexes, housing estates with Perimeter Fencing, IP Surveillance, and Burglar Alarm Systems serving a major role. End Users can watch their home and around for their personal security, safety and operational needs from anywhere in the world.

Cities:

Surveillance is required over wide range in areas and must deliver evidential standard video in city centres. Regional security is of paramount importance to the Police Department, who requires TORIMA intelligent supervision solutions to watch and to ensure public security and enable quick emergency response.

Government Lodge:

Government organizations need optimal Security and Safety Solutions for their citizens. We work keenly with Government firms to render them with workable, top-quality solutions like City Surveillance, Visitor Management System, Solar Traffic Light, Solar Street Light, Surveillance and Access Control System for Government Houses and Government Properties.

Commercial and Industrial:

The elasticity and compatibility of Torima Technologies systems are well designed for industrial and commercial demand. We have a wide range of products for commercial and industrial uses panning across Person/Vehicular Access Control, Fire and Safety Protection Systems, Staff Time Attendance System, Perimeter Fencing, and operational surveillance for both security and operational productivity.

Ports:

Ports are unavoidably vulnerable to potential 'gaps' in security being scattered over extended areas, Analog CCTV becomes growingly cost-prohibitive over broader and vast areas, whereas IP takes small account of distance and can be positioned obviously over wireless links. IP is also exceptionally cost effective for surveilling from multiple spot, and for swift camera deployment and reconfiguration of the system as operational needs grow.

Retail Businesses/ Organization's/NGOs:

Our products are manufactured to be used by fast Food Restaurants, many Retail Businesses, Organizations and NGOs that have numerous locations in various cities around the world. We provide Security and protection for staff and customers from major retail brands to small shopping malls.

Health:

We render Hospital Management Software. Many Hospital CCTV surveillance systems can be remodelled to IP Video solutions and have advantage from the quick installation and least disruption to their day to day activities. An important analysis for any healthcare environment such as authorizing all the sites to be cardinally monitored from the Central Hospital.

Hospitality:

Torima Technology renders numerous Security and Automation products for Hostels and Hospitality industries in Nigeria such as Automatic Sliding Door, Hotel Card Locks, Hotel Management Software, CCTV Cameras, Staff Time Attendance unit, Fire Alarm System /Smoke Detection, Entrance Barrier Access Control, Point of Sale System, Wireless Intercom and so many more.

Finance:

Financial Institutions and Banks can utilize TORIMA IP Video solution connected with an access control system to watch thousands of people going in and out of headquarters and branches facilities every day at the same time from one or multiple locations.

Aviation and Airports:

Airports Authorities and Aviation can utilize TORIMA Technologies security and automation products such as Luggage Scanners, Walk-through Metal Detectors, Automatic Sliding Door Systems, Fire Alarm and Safety Management products for their everyday operations.

Airports generally have series of video 'consumers', not just Police, security staff, Check-in, Screening, Customs, Baggage handling, Fire, and Ground Staff all have an regards to examine video from around the site. This is very expensive with analogue-switched systems and infrastructure basically having to be reproduced for each set of users. With IP, any authenticated user can access it once the video data is on the network.

Police and Prisons:

Torima Technology IP-CCTV system can transform how Police and Prisons watch their operation and deliver to them quick video survey and better incident response such as taking note of interviews with prospective offenders, and for monitoring holding and custody cells.

Oil & Gas/Petro Chemicals:

The security problem facing Pipelines, petrochemical sites and Oil & Gas Stations are many and intricate. The essential tool to manage health and safety, monitor incidents, protect assets, detect theft and combat terrorism in Petrochemical sites, is an aggressive wide supervisions system because this area highly volatile environments.

OUR SERVICES

Motor/Tricycle/Car/Truck/Boat Tracking

Speed Limit,

CCTV,

Electronic Door,

Gate Automation,

Retail POS Installation,

Revolving Doors,

Access Control Locks,

Electric Security Fence,

Parking Management System,

Automation Systems,

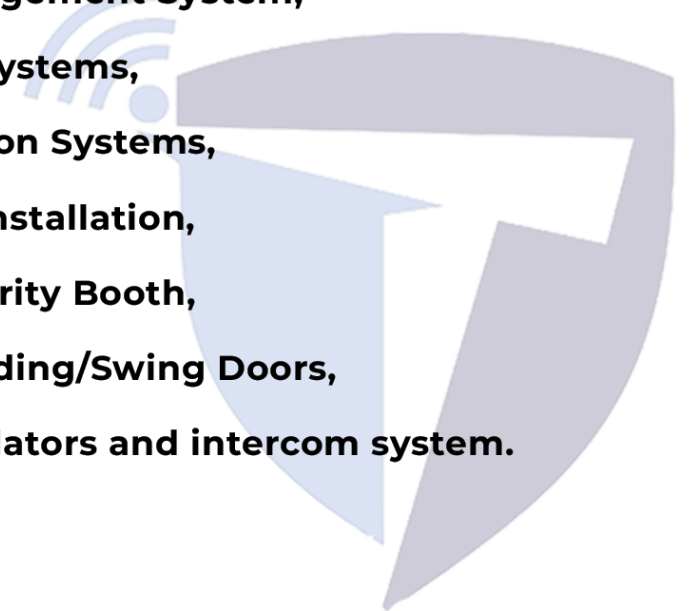

Metal Detection Systems,

Speed Limit Installation,

Mantrap Security Booth,

Automatic Sliding/Swing Doors,

Elevator/Escalators and intercom system.

CATEGORIES OF OUR ICT PRODUCTS AND SERVICES

Security Systems.

- Police Body Worn Cam
- Digital Under Vehicle surveillance system
- Electric Perimeter Fence System
- Man, Trap Security Bank Door
- GPRS Motorcycle/Car/Truck/Boat Tracking
- EAS Anti-theft system
- CCTV
- Walk through Metal Detectors
- Xray Baggage Scanner

Safety Systems

- Road studs
- Speed Limiters
- Fire Alarm System
- Speed Bumps

Communication systems.

- Intercom system
(Wireless, Wired and IP phone)
- Digital delegate Conferencing system

Rfid systems

- RFID Hotel Lock system
- Rfid Biometric Access Control Systems
- RFID Asset Tracking
- RFID File Tracking
- RFID Vehicle Tracking

CATEGORIES OF OUR ICT PRODUCTS AND SERVICES

Access Control systems.

- Turnstile Access Control System
- Library Automation System
- Loop Inductance Detector system
- Renewable Energy
- Solar Systems/Inverter
- Solar Traffic Light
- Solar street Light
- Solar Borehole

Automation Systems.

- Elevator and Escalator
- Revolving Doors
- Automatic Sliding/Swing Doors
- Automatic sliding and swing gates

Parking Management systems

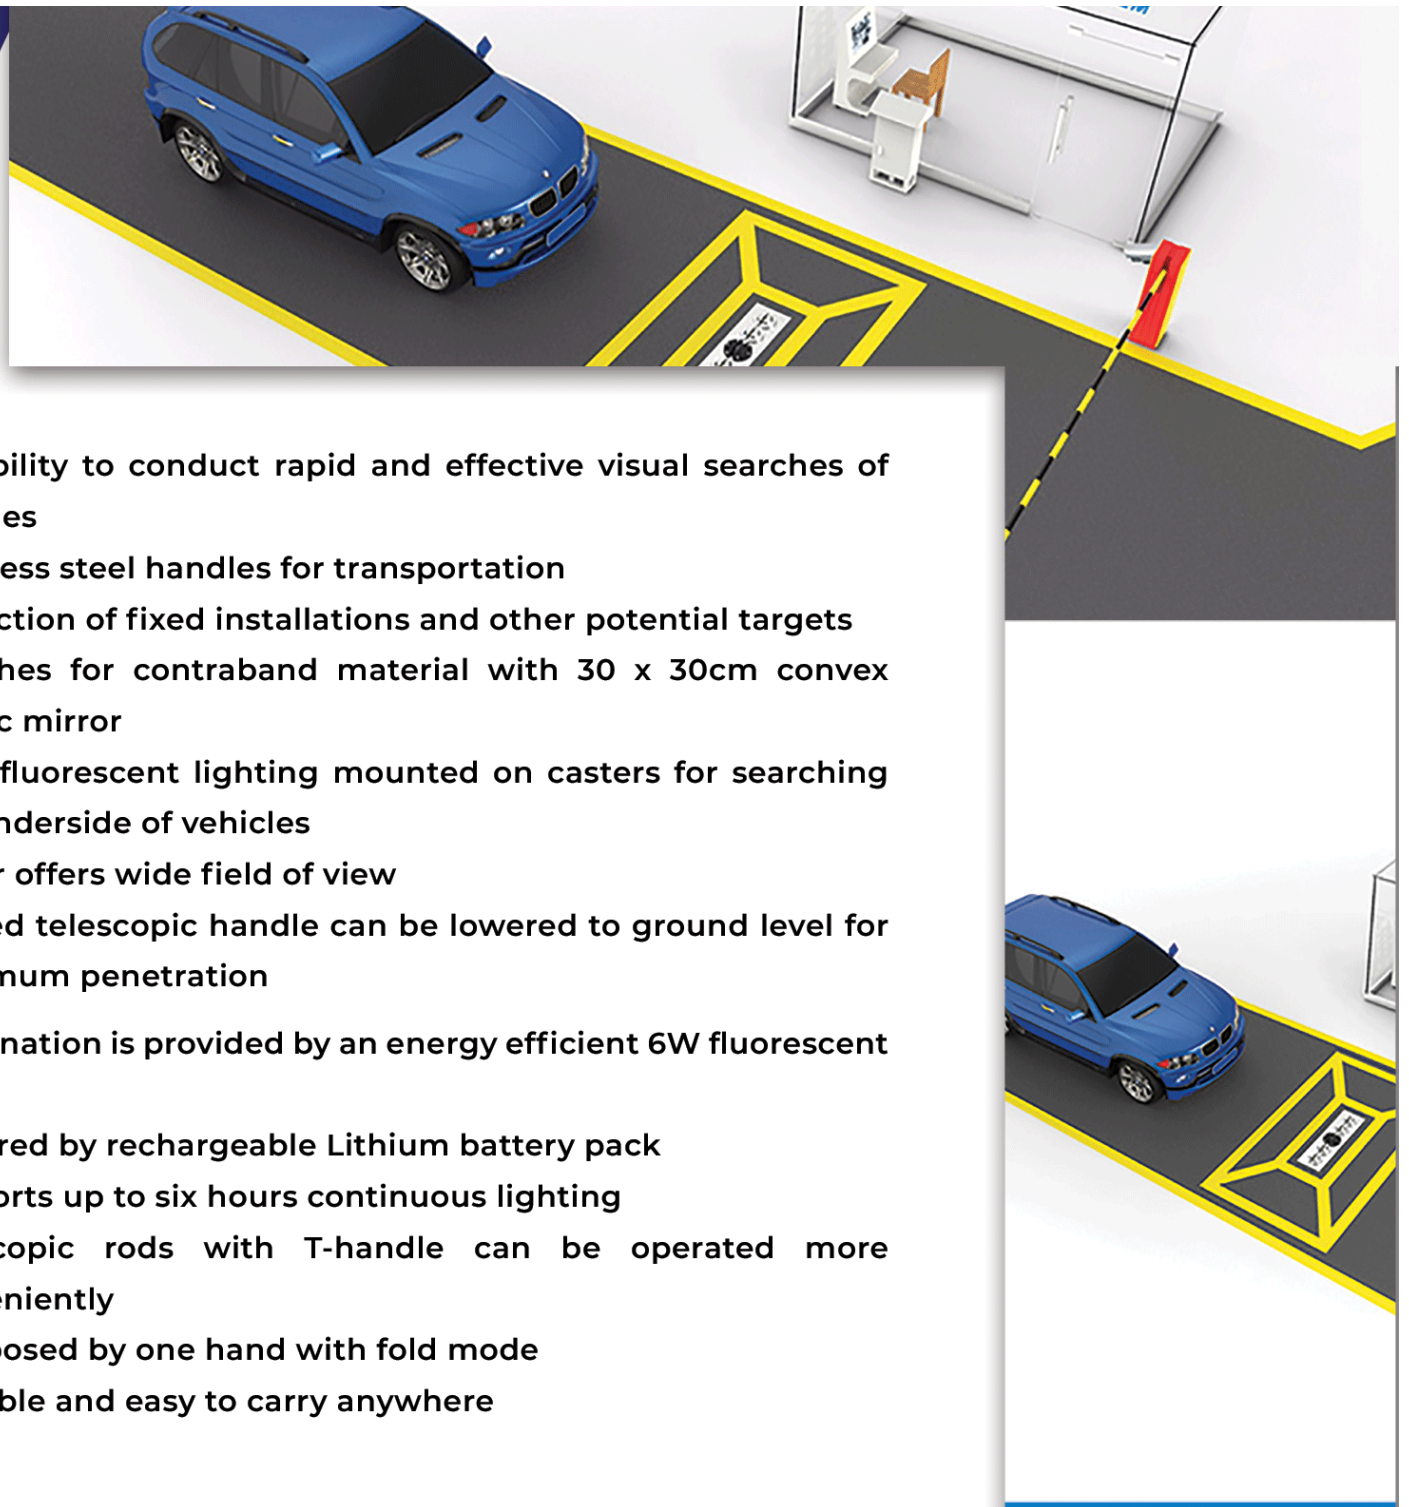

- Guidance Parking management system
- Ticketing parking management system
- Tire Killer spike barrier
- Road blocker barrier system
- Bollards Access control system
- Boom barrier system

Business Solution Systems

- Software Solutions
- Queue Management System
- Visitor Management System
- POS Hardware and Software
- Employee Time Attendance Machine
- Multi-Media Led display
- Metal Detection System
- Walk through Metal Detector System

UVSS (UNDER VEHICLE SURVEILLANCE SYSTEM)

- Capability to conduct rapid and effective visual searches of vehicles
- Stainless steel handles for transportation
- Protection of fixed installations and other potential targets
- Searches for contraband material with 30 x 30cm convex acrylic mirror
- With fluorescent lighting mounted on casters for searching the underside of vehicles
- Mirror offers wide field of view
- Hinged telescopic handle can be lowered to ground level for maximum penetration
- Illumination is provided by an energy efficient 6W fluorescent lamp
- Powered by rechargeable Lithium battery pack
- Supports up to six hours continuous lighting
- Telescopic rods with T-handle can be operated more conveniently
- Composed by one hand with fold mode
Foldable and easy to carry anywhere

MANTRAP SECURITY BOOTH

Torima Technology Man trap door system is good for bank entrances and exit and other top security establishment. This equipment provides safety, security and environmental control in any establishment. Choose from quality systems and access hardware to confirm that doors may be locked or unlocked only when the appropriate situations happen. Or supply with special adequate requirements and specification and we will engineer a man trap system for you.

This gadget is good for bank entrances and other top security organization, like Jewellers. It is highly used as it is a very powerful means of safeguarding buildings without putting employees or clients in risk, as the intruder can be trapped in the bullet-proof booth until assistance comes.

This equipment is vital for bank entrances and other top security organization like Jewellers for instance. It is greatly used as it is a very productive means of protecting premises without placing employees or clients in risk because the intruder can be trapped in the bullet-proof enclosure until help arrives.

SWING AND SLIDING GATE AUTOMATION

This top feature sliding gate operator, present in a full range of versions, offers a combination of strength and style. This safe and adaptable operator is ideal for any gate, thanks to the adjustable tools supplied (torque in oil bath), which are a differentiating quality of the undisputed success of its great reliability. Clarity and possibility: this recent oil-hydraulic piston has been constructed and designed in order to meet different market needs.

Only Torima Technology a foremost company in the zone can guarantee this kind of strong product. It marks a decisive step forward in external oil-hydraulic swinging gate automation.

TURNSTILE SYSTEM

The Torima Technology chains of tripod turnstiles are constructed to operate pedestrian's entrance or exit security-controlled region. The quality model has an aisle (lane) width of 520mm and the limit of the lane can be 600mm. We can use Torima Technology tripod turnstiles model in two-directional control applications with top volume pedestrian traffic. This section has been arranged to produce a beneficial anti-tailgating pedestrian result exploring a tri-arm bar design with 3*120° movement.

When there is need for you to secure the perimeter of your equipment's, full height turnstiles are the real solution. They are also relevant when you need to regulates access through a required entrance or exit and can be connected to any access control system, token system, coin fee paid entry system and any other exterior operating gadget.

Designed from galvanized moderate steel or stainless steel and are constructed and modelled to the top-most-quality grade for longevity and durable capacity, they can be configured both internally or externally and are highly simple to operate and use.

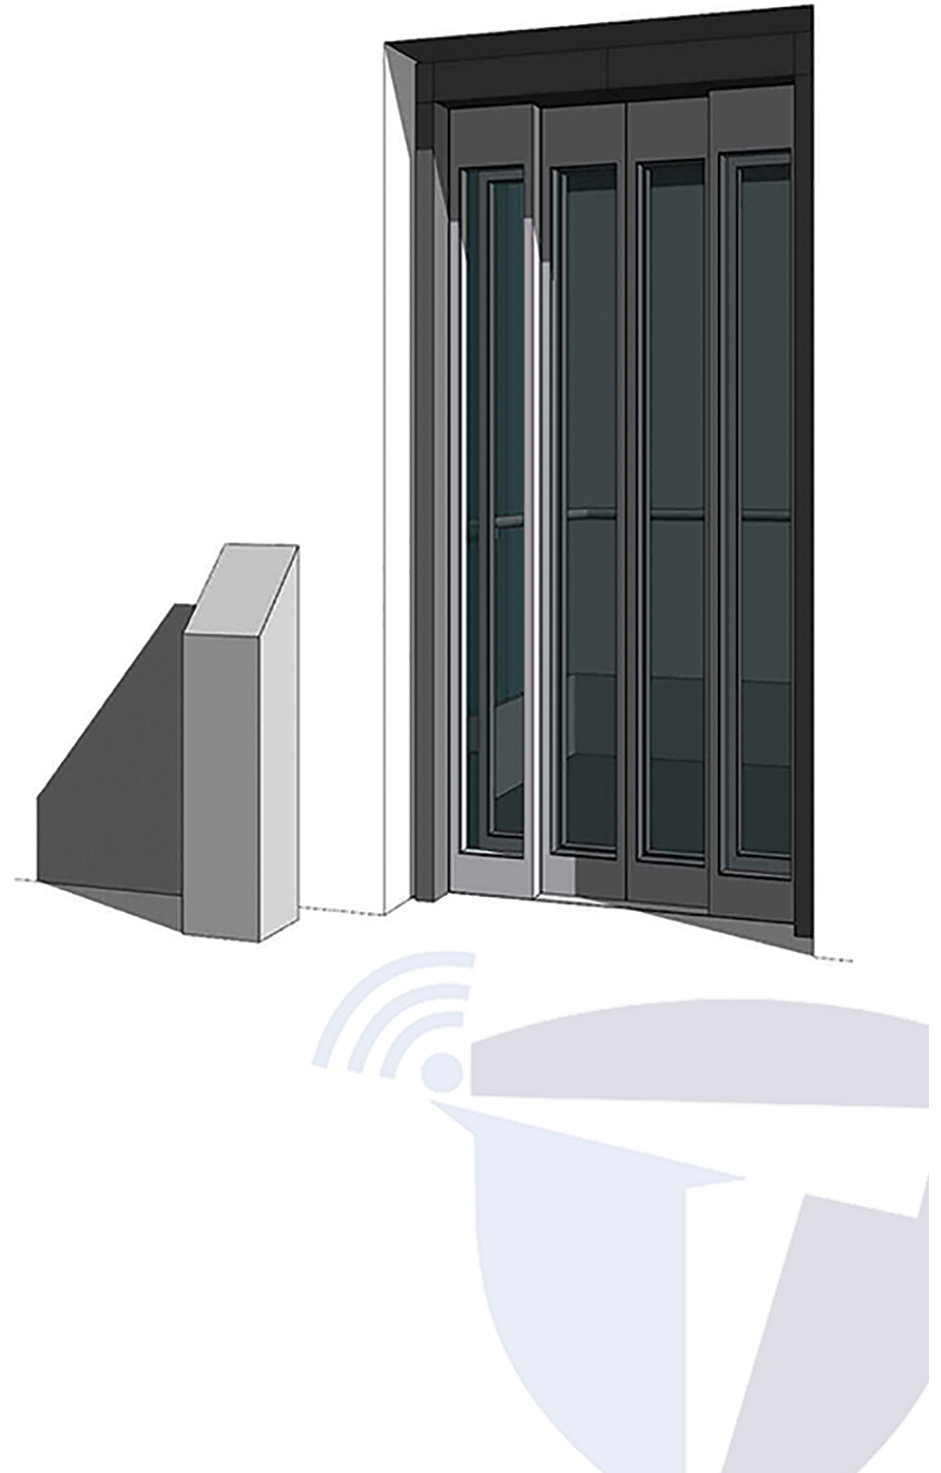

ELEVATOR/ESCALATOR

Torima Technology series escalators and elevator are designed to meet the demands of passengers' safety and travel. They combine advanced technologies and apply new materials while integrating the safety, practicality, durability and visual beauty, which can ensure smooth movement of urban passenger flow and create humane public transport solutions.

Elevator and Escalator equipment's can wear down through the years. Our services include repair and maintenance to ensure your elevator is functioning properly. Part of our maintenance also includes annual elevator safety tests. The last thing we want is for elevators to fail and passengers stuck in between floors.

We offer elevator modernization service for older buildings with outdated technology. We will completely upgrade your elevator units to the latest and most efficient equipment's.

ELECTRIC PERIMETER FENCING

Can effectually safeguard Your Family and Home against Intruders and Burglars whether you are in or not. Electric Fencing – Intruder Detection and Deterrent.

Security is a vital issue for everyone today; perimeter fencing is used very productively to aid with home, hotels, warehouse, factories, schools and car park security. Electric-Fence controllers have a flawless security record.

Vital System Qualities:

Controller continuous monitoring

Interfaces with standard security equipment

Visual & physical intruder deterrent

Shock, voltage & short circuit monitoring

Cut & climb monitoring

High Db Alarm Buzzing\

Advantages of Electric Perimeter Fencing Security System:

Torima Technology known the need of security and understand the supreme ways to secure your home or business. We have equipped professionals and consultants who can assist you choose which security system is good or bad for your home, business or property and a specialize crew ready to give free support. The security and insurance advantages are unparalleled.

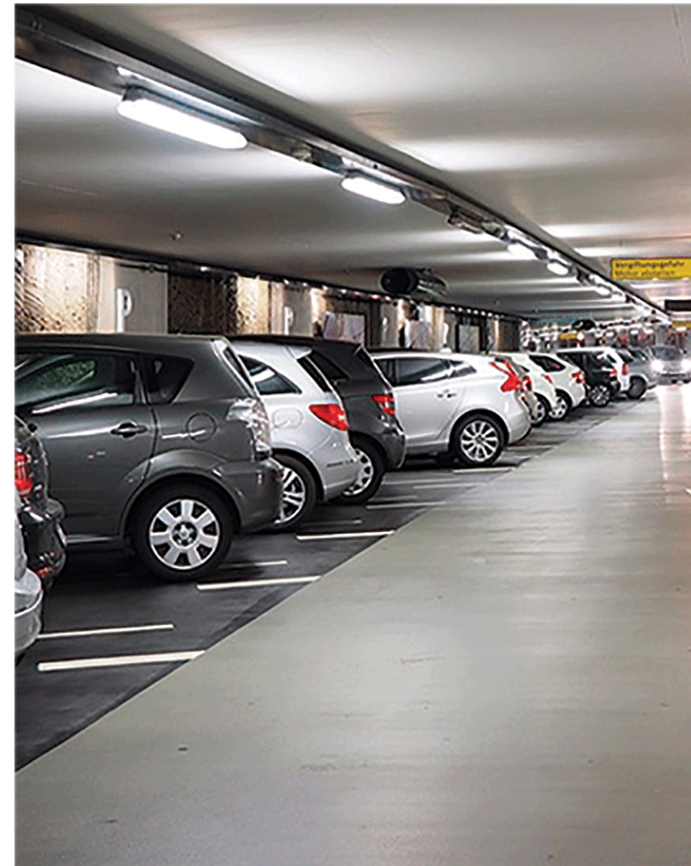

PARKING MANAGEMENT SYSTEM

Torima Technology provides car parking system which comprise of a full package multi-media parking charging management system that is made of electronic IC card as the vehicle's document to the parking lot, similarity of the vehicles' image and management of catching shoots of the certificates as the core, to get automatic controlling and managing the parking lot's entrance and exit equipment's, automatic charging for the parking cars by the redesigned charging standard.

Data is available in both tabular and graphic formats and it allows the user interface to be tailored to your application. In addition to the software is a client version allowing various users to remotely monitor the parking facility.

Integrated car parking management system which can administrate regular and temporary customers, having the possibility of time-charging.

HOTEL CARD LOCK

Can powerfully protect and secure Door Access to Hotels, with installed Check-In and Check-Out Date and Time to give Guests and Owners Peace of Mind

Automatic Locks are current improved way of being able to access a room or home without having to use a large key; this kind of keys is unlocked with a PVC Smart Card or RFID Access card that is simple and look like a credit card.

Torima Electronic key which is manufactured especially for Hotels & Resorts attract guests and hotel owners with its exclusive finesse.

A sizeable range of RFID locks from complete body mortise locks to sectional trim locks have been modelled to react to the security requirement of any Hotel or Property on any budget. Our RFID locks read and write to a range of MIFARE credentials as well as near field communication (NFC) equipped cell phones and devices.

CCTV

CCTV can prove to be a priceless asset to your security system. In the event that accidents, criminal damage, a break in or suspicious behaviour has to be investigated, CCTV footage can provide vital evidence for settling the case further to detecting crime, the very presence of a CCTV system can dramatically deter crime from taking place, thereby reducing the risk of damage or loss to property why protecting the safety of occupants

CCTV Systems supplied by Torima Technology has the following features:

- Adjustable Eye Ball Cameras
- Infra-Red Vision
- DSS Night-Vision
- Wireless technology
- IP systems
- Anti-vandal designs
- Thermal imaging cameras
- Different lenses including varifocal
- Variety of image resolutions
- Weatherproof outdoor casing
- Pan Tilt and zoom features (PTZ)
- Fast spinning cameras
- Discreet housing to disguise equipment

REVOLVING DOOR

Our Revolving doors maintains world class style and function and at the same time leaves room to help manage tight construction budgets. It is available in manual and automatic and can be customized with A, B, C, D and E attachment types. It uses fully formed and welded aluminium, stainless steel or bronze construction on the enclosure and canopy, but allows the wings to be clad in stainless steel or bronze over an aluminium subframe.

RC: 1423225

BIOMETRIC ACCESS CONTROL LOCKS

Human fingerprints are extremely detailed and nearly unique. What is more, they are also very difficult to fake or alter and can endure over an individual's lifespan. This makes them very suitable as long-term markers of human identity. When the technology which can recognize and differentiate between fingerprints is deployed in securing access to a door way, you get a "Fingerprint Door Lock System".

VEHICLE TRACKING AND SPEED LIMITER

Torima Technology is known for the shipment, sales and installations of all form of Motorcycle/Tricycle/Car/Truck/Boat tracking devices and speed limiter.

We render a wide range of GPS trackers and GPS Tracking apparatus that are perfect for private or business use. Regardless of if you need a GPS Tracker to protect or redeem your vehicle from theft, Transport, a convoy of vehicles for Haulage, Cabs/Taxi Businesses. TORIMA TECHNOLOGY PROVIDES THE BEST GPS PRODUCTS FOR YOU.

INTERCOM SYSTEM

WIRELESS INTERCOM

This is a complete wireless intercom system. It is the very first wireless intercom system that is extendable to 100 units from numbers 0 to 99 units. It is a plug-n-call system that needs no installations thereby incurring no installation cost. It also works with or without electric power. It is so rugged but very simple to operate.

IP PHONES

We market and install IP PBX and voice over IP VoIP products in Nigeria. We trade and set-up IP-PBX products in Nigeria and we are devoted to the delivery of current generation communication products.

PABX TELEPHONE SYSTEM

We market and install PABX Telephone System in Nigeria. We trade and set-up PABX products in Nigeria and we are devoted to the delivery of current generation communication products.

X-RAY BAGGAGE SCANNER

Torima Technology X-Ray Baggage inspection machines are widely used in postal logistics, airport and railway, customer port, public security bureau, procuratorate, court, prison, conference centre, hotel, exhibition centre, stadium, library, museum, factory and other public places to check closet prohibited items and flammable items, such as guns and ammunition, cutlery, narcotics. detonator, firecrackers alcohol, gasoline etc.

TIRE KILLER SPIKE AND ROAD BLOCKER

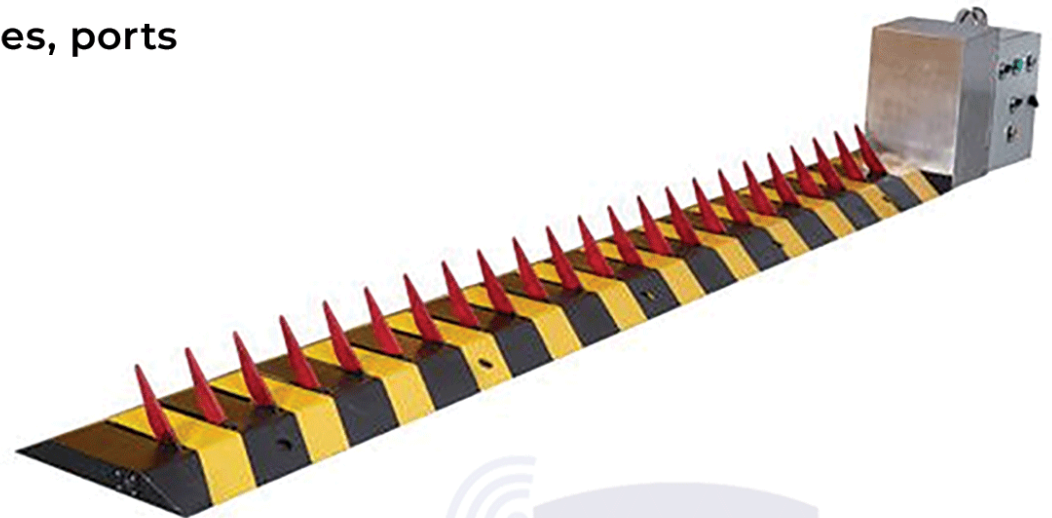

Our Road blocker and Tire Killer Spike Barrier series are widely used in highway toe station, checkpoints, prisons, airports, churches, Mosque, Government agencies, embassies, military base-station, custom ports, banks, industrial and mining companies, ports warehouse, parking.

FEATURES

- Vandal resistant
- Constructed to comply with BS6571 part 4
- High quality coating system
- Manual hand pump facility
- 3 phase 50Hz supply 415V

BENEFITS

- Durability
- Reliability
- Service parts
- Ease of installation
- Manual operation in the event of power failure

RISING BOLLARD

This fluid-hydraulic BOLLARDS product has been constructed to guarantee optimal safe environment from any entrance. When completely reduced, the post, which varnish entirely, is design with hard steel. During motion, it is made visible by the shining caution lamps, in agreement with new safety regulation. In the occasion of a power failure, the post can be reduced by carrying out an easy action utilizing the free key.

Personal use and for reserved spaces:

Private parking – parking areas for the crippled – parking spaces for Company directors – parking spaces for customers;

Access control:

Company, Private, commercial and Industrial vehicle accesses;

Control for Restricted vehicle traffic and pedestrian zones:

Pedestrian areas — City enters — traffic lanes kept for public transport vehicles (taxis –trams – buses) street market areas;

Anti-Trespass and anti-terrorism protection:

Police stations and military headquarters, Ministerial establishment and delicate sites, company and forwarding agent warehousing facilities services – shopping centres – research buildings, embassies in general.
